Are Investors Today Too Complacent?

June 28, 2019

Michael Hasenstab, Ph.D.
Chief Investment Officer,
Templeton Global Macro

Templeton Global Macro CIO Michael Hasenstab recently shared his perspective on investing at FundForum International 2019 in Copenhagen. He outlines why he thinks many investors are too complacent today, leading to some “dangerous” risk-taking. He also cautions why he thinks the next decade won’t be like the last for investors.

What Are the Risks?

All investments involve risk, including possible loss of principal. Stock prices fluctuate, sometimes rapidly and dramatically, due to factors affecting individual companies, particular industries or sectors, or general market conditions. Bond prices generally move in the opposite direction of interest rates. Thus, as prices of bonds in an investment portfolio adjust to a rise in interest rates, the value of the portfolio may decline. Special risks are associated with foreign investing, including currency fluctuations, economic instability and political developments
